

## Sprint 4 Report

### Equip Invest Contract

### EIC

Actions to stop doing:

Actions to start doing:

Actions to keep doing:

- Get started early
- Knowing what tasks are dependent on each other
- Test full stack after creating API call before trying to integrate into front end to isolate errors
- Documenting code more
- Communicating well and doing all the work that need to be done. Use slack to communicate often. Keep future tasks in mind as we develop.
- Pushing code changes consistently

Work completed:

User story 7 ("As a student/buddy, I need to be able to view and create posts to the central resource page so that there is content there")

User story 9 ("As a company, I need to be able create contracts so that students see what I am looking for in a contractor.")

User story 16 ("As a user, I want to be able to access the website online so that I can use it.")

User story 17("As a company, I want to be able to edit my profile information so that I have control over what info the platform stores about me.")

Work not completed:

User story 9 ("As a company, I need to be able create contracts so that students see what I am looking for in a contractor.")

1. [5 hours]Create paginated call to get posts from contract schema

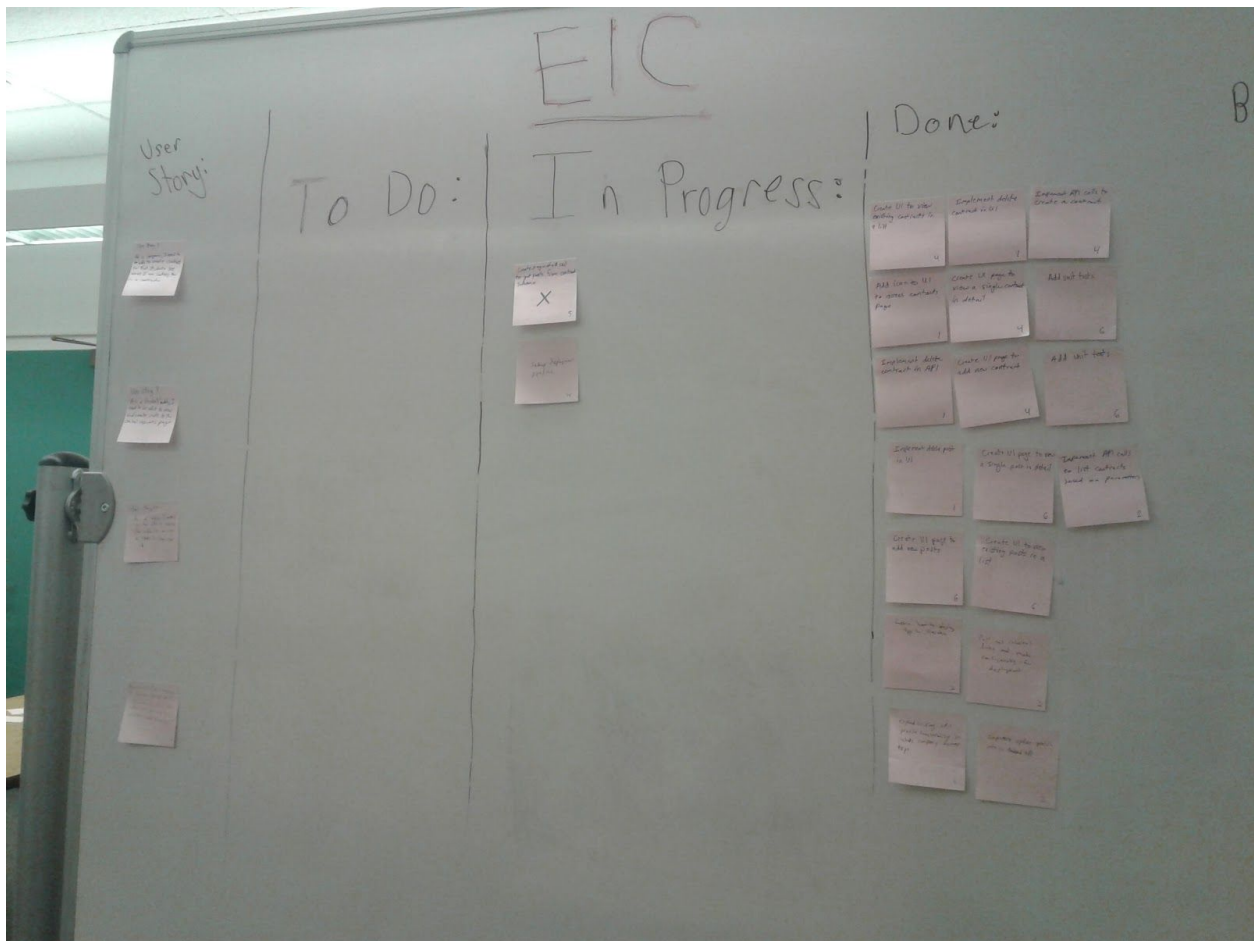

User story 16 ("As a user, I want to be able to access the website online so that I can use it.")

3. [4 hours] Setup deployment pipeline.

Work completion rate:

- 4 user stories completed during sprint
- 66 ideal work hours completed
- Sprint was 14 days in length
- 4.71 work hours completed per day
