

Release Plan
Equip Invest Contract
EIC
Release 1
3 December 2018
Revision 6
Revision date: 2 December 2018

High Level Goals:

Create a web application which links people wanting to learn a skill, industry professionals willing to answer questions, and companies wanting to contract work to people with desired skill sets. All three parties will have access to a central resources page, which provides resources for students to reference/learn from, such as links to helpful learning sites/documents. Students will be able to create connections with someone in their desired industry (a “buddy”) in order to ask them questions which are not clearly answered in the resources. Companies are able to create contracts which students can view in order to learn the skills listed in the contracts.

User stories for release:

Sprint 1:

- (32) User story 1 (“As a user, I need to have a web app served to me so I can access the platform”)
- (32) User story 2 (“As a user, I need to have a UI so I can use the web app”)

Sprint 2:

- (32) User story 3 (“As a student, I need to be able to create an account in order to use the platform”)
- (16) User story 4 (“As a buddy, I need to be able to create an account in order to use the platform”)
- (16) User story 5 (“As a student/buddy, I need to be able to send/accept requests in order to establish connections”)
- (16) User story 6 (“As a student/buddy, I need to be able to view my established connections so that I can contact them and remember who I’m connected with”)

Sprint 3:

- (32) User story 7 (“As a student/buddy, I need to be able to view and create posts to the central resource page so that there is content there.”)
- (8) User story 8 (“As a company, I need to be able to create an account so that I can use the app”)

(8)User story 13 (“As a Student/Buddy, I want to be able to delete my Student/Buddy connections so I can manage my connections more efficiently”)

(24)User story 14 (“As a User, I want to be able to have a profile picture so that I can be distinguishable among other users”)

(12)User story 15(“As a user I want to be able to edit the information on my profile so that I have control over my account info.”)

Sprint 4:

(16) User story 9 (“As a company, I need to be able create contracts so that students see what I am looking for in a contractor.”)

(8) User story 10 (“As a company, I need to be able to post to central resources page so that I can provide helpful resources to students/buddies”)

(16) User story 16 (“As a user, I want to be able to access the website online so that I can use it.”)

(16) User story 17(“As a company, I want to be able to edit my profile information so that I have control over what info the platform stores about me.”)

Product Backlog:

- User story 9 (“As a company, I need to be able create contracts so that students see what I am looking for in a contractor.”)
 - We did not have enough time to create a paginated call to list the current contracts
- User story 11 (“As a company, I need to be able to contact students that I’m interested in in order to notify them of my interest”)
 - We did not have enough time to implement this feature. The contact email address is listed for all users, so users can use that to contact each other instead.
- User story 12 (“As a student, I need the ability to contact companies that I am interested in in order to apply for contracts”)
 - We did not have enough time to implement this feature. The contact email address is listed for all users, so users can use that to contact each other instead.
- User story 16 (“As a user, I want to be able to access the website online so that I can use it.”)
 - We were unable to a create a deployment script due to some of the complexities of deploying to Heroku
