Sprint 1 Report
Equip Invest Contract
EIC
18 October 2018

Actions to stop doing:

We would like to stop having "loose" Scrums concerning time, and use our time effectively within the strictly timeboxed Scrum. We need to follow the three questions of Scrum exactly as opposed to having discussions related to what we bring up.

Actions to start doing:

We need to merge to master more often. When we started, we were unable to do this because we needed to create a stable framework. Now that we have a stable framework, we are able to merge our changes more often without creating issues. This will allow us all to have a general sense of what the product looks like at any given point of development.

Actions to keep doing:

Communicating well and doing all of the work that needs to be done. We use slack often to communicate and have been doing all of our work on time. Also to keep learning and keeping future tasks in mind as we develop. This will allow for easier implementation in the future.

Work completed/not completed:
    User stories completed:
        ● "As a user, I need to have a web app served to me to access the platform"
        ● "As a user, I need to have a UI so that I can use the web app"
    User stories not completed:
        None

Work completion rate:

- 2 user stories completed during this sprint
- 55 estimated ideal work hours completed during this sprint
- This sprint was 14 days in length
- (1/7) user stories per day completed
- 7.86 ideal work hours per day completed
